Subject: RE: NWIRP Monthly Report

You are well aware of Massapequa's position on this. We have written numerous letters on the issue, spoken at countless meetings, and met with you personally dozens of times. In case you have forgotten: MWD wants to see the plume contained at the leading edge which is well south of Hempstead Turnpike. This would require recovery wells south of Hempstead Turnpike. The Navy progress report has stated the same update on this subject month after month when MWD had provided property locations, contacts, and maps of specific locations. The Navy progress report is a joke at best. I truly hope it is not acceptable to you. When will we see a true progress report with specific details?

Stan Carey, Superintendent Massapequa Water District

Stan - I'm not sure what you mean by "recovery wells south of Hempstead Turnpike". Are you talking about the RE108 hot spot (which is near BWD Plant 6)? If that is the case, the 7th, 8th, 9th and 12th bullets discuss ongoing activities relative to the hot spot. Also, I believe that a number of the wells listed in 13th and 14th bullets are in support of that hot spot. Please give me a call and we can discuss in detail if you want. Jim H

James B Harrington, PE Director, Remedial Bureau A Division of Environmental Remediation 518 -402-9624

Jim,

Many important items in this report remain unchanged month after month. In some cases over a year. Not sure how this can be considered progress. Can you provide any information on what DEC is doing to move things along as far as recovery wells south of Hempstead Turnpike?

Stan Carey, Superintendent Massapequa Water District
